PROFESSIONAL SUMMARY

Self-motivated and result-oriented Power Platform Developer with 3+ hands-on experience in full project lifecycle, including requirement gathering, solution design, development, testing, UAT, and deployment. Proficient in modernizing legacy workflows and forms (Nintex, InfoPath, SPD) to Power Automate and Power Apps. Experienced in content migration projects from SharePoint 2019 to SharePoint Online. Strong problem-solving skills and proven ability to collaborate with stakeholders to deliver scalable low-code/no-code solutions.

WORK EXPERIENCE

TATA CONSULTANCY SERVICES

Pune, MH

Senior System Engineer - Power Platform Developer

Sept 2022 – Present

- Worked in SharePoint 2019 to SharePoint Online content migration project covering over 900+ sites across multiple regions including USA, Ireland, and India, for the client Northern Trust. Executed the project in two main phases and seven waves, collaborating with a global team of 90 team members 100+ stake holders.
- Conducted in-depth requirement analysis, effort estimation, development, code refactoring, and peer code reviews. and maintained comprehensive technical documentation including Solution Design Documents, Dev Notes, Unit Test Plans, Customization Hand-off Docs, and Deployment Checklists.
- Played a key role in aligning SharePoint site structures and functionality with client business processes and governance requirements.
- Developed complex Power Automate workflows handling advanced scenarios like item-level permission updates, multi-level approvals, dynamic task assignments, and integration with external systems using REST APIs. Familiar with SharePoint REST APIs and OData queries to interact with SharePoint lists, libraries, and user profiles.
- Re-engineered legacy Nintex workflows with 100+ actions into optimized Power Automate flows using JSON expressions, variables, scopes, and OData filters.
- Managed deployment using Azure DevOps pipelines and also performed manual deployments in certain environments.
- Analyzed critical issues across migrated sites and resolved them through extensive debugging and stakeholder collaboration.
- Coordinated with international site owners for ongoing support, requirement clarifications, and feedback.
- Provided UAT support and Hypercare assistance post-deployment to ensure smooth transition and user adoption.
- Worked extensively with ShareGate for content migration—validated site schema, list structures, custom columns, and site-level permissions before and after migration.

Personal PROJECTS

Timesheet Management Application

July 2025

- Built a complete Timesheet Management solution in PowerApps integrated with SharePoint lists and automated approval workflows.
- Implemented screens for timesheet submission, approval, search, reporting, and administrative settings.
- Added automated email notifications for approvers and employees, along with secure role-based access.
- Leveraged variables, collections, galleries, forms, and PowerApps functions for an end-to-end business-ready solution.
